SUMMARY

Software Engineer with over 5 years of hands-on experience in the game industry, focused on building reusable gameplay, content, and engineering systems for shipped and cross-platform projects. Strong in C++, C#, Unreal Engine, and Unity, with experience developing gameplay systems, data-driven content workflows, UI, debugging tools, testing frameworks, and maintainable architecture. Skilled in technical planning, software architecture, and cross-functional collaboration with engineering, design, art, and QA teams.

WORK EXPERIENCE

Game Developer | Swordmonkey Studios | 01/2026 – Present

- Develop gameplay and UI features for *Democracy in Action*, a released collection of Godot minigames.
- Built AI-controlled bots for *Volunteer Dispatch*, including decision-making and player-like pacing.
- Implemented procedural obstacle and environment variation for *Pamphlet Drop*.

Senior Game Developer | Muslim Kids TV | 09/2024 – 10/2025 | 1y 1mo

- Served as the sole developer for six released Unity games across WebGL, iOS, and Android.
- Created a narrative tool for arranging dialogue, positioning characters, and assigning character-specific moods, animations, and audio.
- Reduced CPU usage by 30% by profiling and optimizing physics and gameplay systems.

Unreal Engine Programmer | Byzantian Interactive, Inc. | 05/2024 – 08/2024 | 4mos

- Developed C++ and Blueprint features for *Knights of the Fourth Age*, a PC and console game.
- Implemented replicated multiplayer combat abilities using Unreal Engine's Gameplay Ability System.
- Built an inventory and equipment system for customizing character clothing and weapons.

Technical Leader | Medrick Game Studio | 01/2023 – 08/2023 | 7mos

- Led eight junior developers through five major game updates.
- Scoped tasks, reviewed code, mentored developers, and coordinated delivery with design, art, production, and QA.

Senior Game Developer | Medrick Game Studio | 06/2021 – 01/2023 | 1y 7mos

- Designed and developed a reusable social package containing teams, chat, and leaderboards for use across multiple games within the studio.
- Contributed social features that supported a 20% increase in player engagement.
- Implemented performance-critical multithreaded systems to improve runtime responsiveness.

Game Developer | Medrick Game Studio | 08/2020 – 06/2021 | 10mos

- Developed gameplay and UI features for *Golmorad* and *Dream Home: Mansion Makeover*.
- Built an automated testing framework using Unity Edit Mode, Play Mode, and unit tests.

SKILLS

- **Programming Languages:** C++, C#, Python
- **Game Engines:** Unreal Engine, Unity, Godot
- **Development:** Gameplay systems, UI, multiplayer, editor tools, procedural animation, automated testing, profiling, optimization
- **Software Architecture & Practices:** OOP, SOLID, MVC, MVP, ECS, MVVM, Design Patterns, Clean Code, Technical Documentation
- **Workflow & Collaboration:** Git, Agile, Scrum, Code Reviews, Cross-Disciplinary Collaboration

EDUCATION

- **Graduate Coursework in Computer Science**
University of Alberta | 09/2023 – 05/2024
- **Bachelor of Engineering in Computer Engineering**
University of Tehran | 09/2017 – 02/2022
Final Project: Developed 9 interactive games using Unity 3D and C#
Awards: Finalist for Best Undergraduate Project.

PERSONAL PROJECTS

Procedural Animation Systems | Unreal Engine, Control Rig, Animation Blueprints | Present

- Built procedural look-at, body-turning, IK pickup, and environment-aware crouching systems.
- Created custom poses and a runtime system that transitions naturally between them using Control Rig and Animation Blueprints.

3D FPS Horror/Comedy Game | Unreal Engine, C++, Blueprints | Present

- Developing a first-person horror/comedy game inspired by survival horror.
- Built a *Resident Evil*-inspired pickup and inventory system.
- Implementing reusable gameplay interactions in C++ with Blueprint integration.
